EDUCATION

- **National Taiwan University (NTU)** Taipei, Taiwan
 - Bachelor's degree in Computer Science and Information Engineering* Sept. 2020 – Jun. 2025
 - Bachelor's degree in Sociology* Sept. 2021 – Jun. 2025
 - Recipient of the 2020 National Taiwan University Fu Bell Entrance Scholarships (70 out of 3758 students).
 - Completed one-year exchange program at KTH Royal Institute of Technology in Sweden from 2022 to 2023.

SKILLS

- **Languages:** C/C++, Python, Go, Java, Bash
- **Cloud & Infrastructure:** AWS, GCP, Kubernetes, Terraform, Helm
- **Tools & Technologies:** Git, Linux, Docker, CI/CD (GitHub Actions, GitLab)

EXPERIENCE

- **Trend Micro** Taipei, Taiwan
 - Cloud Engineer* Jun. 2025 – Now
 - Owned Trend Micro Anti-Spam Engine (TMASE), a C++ email threat detection engine used across multiple email security products; delivered new detection features, managed monthly releases, and built GitHub Actions CI/CD pipelines that automated build, unit test, and regression test workflows.
 - Migrated AWS infrastructure from CloudFormation to Terraform and provisioned new Amazon EKS clusters with Helm; executed production traffic migration for services handling 10M+ daily email queries and optimized Kubernetes resource allocation and Karpenter autoscaling to improve cost efficiency.
 - Implemented backend features for Erato, a Python/LangGraph LLM-based email threat analysis service, including tenant-aware tracing integrated with existing OpenTelemetry and Langfuse infrastructure, and built a Go service exposing TMASE scanning capabilities to the LLM evaluation pipeline.
- **Thingnario** Taipei, Taiwan
 - Site Reliability Engineering Intern* Jun. 2023 – Aug. 2023
 - Integrated testing scripts across diverse GCP servers using the centralized scheduler/runner Cronicle, consolidating error messages into an Elasticsearch-powered database for streamlined log analysis and more effective troubleshooting.
- **Research Institutes of Sweden (RISE)** Stockholm, Sweden
 - Research Intern, supervised by Dr. Paris Carbone* Apr. 2023 – Jul. 2023
 - Dockerized and refactored the Java-based throughput assessment of machine learning models across various stream-processing frameworks (e.g., Apache Flink, Kafka Streams, and Spark Streaming) to simulate real-world performance in an industrial setting, leading to its acceptance at EDBT/ICDT 2024.
- **Mobagel** Taipei, Taiwan
 - Software Engineer Intern* Jun. 2022 – Aug. 2022
 - Developed error codes for Decanter AI's AutoML Scala-based system, optimizing data processing, model training, and prediction request handling, which improved error message feedback on the web frontend.
 - Optimized the "sanitizing" module responsible for managing special characters in file headers during user dataset uploads, enhancing data quality and user experience.

ADDITIONAL EXPERIENCE

- **Sensay** United States (Remote)
Machine Learning Intern Jul. 2021 – Aug. 2021
 - Developed automated speech assessment and audio visualization systems for English learning platform.
- **Innoveon** Taipei, Taiwan
Deep Learning Intern Jul. 2020 – Sept. 2020
 - Implemented CNN-based image alignment algorithm for defect detection in manufacturing.
- **Institute of Information Science, Academia Sinica** Taipei, Taiwan
High School Research Project, supervised by Dr. Li Su Aug. 2018 – Jul. 2020
 - Published first-authored paper in ICASSP 2020 on neural network-based violin performance generation.
[\[IEEEExplore\]](#)
- **2022 & 2023 APCS Camp** Taipei, Taiwan
C++ Lecturer Mar. 2022 – Jul. 2023
 - Delivered online lectures on C++ fundamentals to 80 high school students.
